-

Language:

Arabic: Mother tongue

English: intermediate knowledge

Computer Skills:

Programming language and skills: C++, HTML, CSS, Java, Database and SQL, Problem Solving, JavaScript, es6, React, TypeScript, Python, Flutter, Firebase.

Area of Interest

I have burning desire in learning and working in front end development in the two areas, web and mobile specially React and flutter. The application of such state-of-the art technology makes me fully engaged in tiny details related to this market. I am looking for an opportunity as student to exploit and invest my time in learning and working on projects for the sake of enhancing my learning curve and knowledge. I believe the great step started from working in inspired and creative environment.
